Supplies

for Primera LX200e/LX400e/LX500e/LX500ec Color Label Printers

Label Stock – Standard Sizes and Materials

To produce exceptional product labels for your kind of application you not only need advanced print technology such as that integrated in Primera's colour label printers but you also need high-quality substrates.

All Primera Genuine certified inkjet-materials are the ideal choice for labels printed on Primera's LX-Series Color Label Printers, where full process colour is used to add impact and/or functionality to the label. The following substrates are designed for high resolution printing on on-demand roll to roll inkjet-printers.
Primera has many standard sizes available and any material is available as custom made size. There are different adhesives, too, like non-permanent or hot-melt. Labels have a 0.25" (2mm) corner radius.
